SERVICE OVERVIEW

LONGRISE AI PLATFORM · 2026

01 THE LANDSCAPE

THE ERA OF ASSET DEPLETION & HOUSE ADVANTAGE

The hidden contradiction of purchasing-power destruction in traditional finance — and the closed house advantage that individual capital has never been able to reach.

01 REAL ZERO RATES

THE TRAP OF ZERO REAL INTEREST

In an era of inflation driven by rapid currency creation, traditional 1–3% deposit rates act as an invisible prison, continuously diminishing the purchasing power of your capital in real time.

02 MANUAL TRADING

THE LIMITS OF MANUAL TRADING

Manual trading driven by human greed and fear leaves capital exposed to volatility. Emotion-driven decisions inevitably lead to principal losses against the mathematical edge of the house.

03 CLOSED MARGIN

MONOPOLY OVER HOUSE MARGINS

The 2–5% mathematical advantage worth hundreds of billions annually, monopolised by global houses, has historically been an entry barrier reachable only by institutional capital and junket operators.

04 NO CONTROL

NO SECOND-BY-SECOND CONTROL

It is physically impossible for an individual to monitor the continuous volatility of global 24/7 gaming-hub markets, making second-by-second, data-driven risk decisions unattainable.

02 THE ENGINE

BIRTH OF THE HYBRID AUTOMATED ENGINE

Integrating online strategic trading with offline gaming-venue infrastructure — one automated system, settled daily.

LONGRISE is not a custody or investment-solicitation platform. It is a technical platform that bridges **online virtual-asset futures quantitative trading** with **offline land-based casino wagering infrastructure** to deliver steady, daily dividend distributions completely free from human emotion.

01

ONLINE FUTURES QUANT

Executes high-frequency statistical arbitrage within crypto-futures markets.

02

B2B LIQUIDITY VAULTS

Secures the house advantage by maintaining liquidity inside global casino vaults.

03

DAILY WALLET SETTLEMENT

Immediate USDT wallet distribution backed by dual-layer risk controls.

ENGINE TIERS

DAILY AI WAGERING YIELDS & PRODUCT SPECIFICATIONS

Maximising engine scarcity through a staggered, phase-based launch. Yields shown are indicative monthly targets driven by live performance.

ENGINE TIER	ACTIVATION	COMMITMENT	USDT YIELD	CNYT MATCH	MATURITY REFUND (12M)	LAUNCH PHASE
FLEXIBLE	\$100	No commitment	4%~ / mo	None	Immediate 100% return	Phase 1 · M1–M3
BASIC	\$200	12 months	7%~ / mo	2% of USDT yield	Full principal (100%)	Phase 1 · M1–M3
STANDARD	\$500	12 months	9%~ / mo	4% of USDT yield	Full principal (100%)	Phase 1 · M1–M3
PREMIUM CORE	\$1,000	12 months	11%~ / mo	6% of USDT yield	Full principal (100%)	Phase 2 · M4
CROWN VIP	\$5,000	12 months	18%~ / mo	10% of USDT yield	Full principal (100%)	Phase 3 · M5

Staggered Release · Scarcity-Driven · Phase 1 → Phase 3

04 TOKEN MECHANICS

CNYT MECHANISMS & THE ARBITRAGE ECOSYSTEM

Asset integration with the real-world casino portfolio of Horizon Capital Foundation — value preserved, dumping prevented, margin recycled in-network.

\$100M+

TOTAL VERIFIED REAL-WORLD CASINO EQUITY PORTFOLIO

- **Golden Palace · Tbilisi, Georgia** — equity infrastructure integration.
- **Da Nang & Manila** — VIP gaming junket lounges across Vietnam and the Philippines.
- **Ocean Star Resort · Sihanoukville** — VIP operational table rights in Cambodia.
- **On-chain utility** tied directly to physical leisure infrastructure.

VALUE PRESERVATION

STABILITY CORRECTION

- All distributed CNYT auto-adjusts to fixed USD values, mitigating platform financial risk.
- Activation welcome bonuses lock until the **TGE in month 14** to prevent market dumping.
- Continuous token buyback & burn operates via resort-infrastructure integration.

LEADER-EXCLUSIVE · 6% FIXED MARGIN

P2P ARBITRAGE MODEL

Leader groups ranked **Red** or above acquire standard user sell orders at **97%** of face value and use them for new registrations at **103%** — preventing external capital outflow while rewarding advanced ranks.

05 RISK & EXIT

RISK MANAGEMENT POLICIES & EXIT SPECIMEN

Transparent accounting and settlement systems for rational user evaluation — penalties, floors and maturity rules, stated plainly.

EARLY TERMINATION

TERMINATION FEE ARCHITECTURE

Voluntary early termination before completing the committed vault days incurs liquidity-provisioning costs to safeguard platform solvency.

$$\text{Refund} = \text{Principal} - \text{Distributed Yields} - \text{Liquidity Provision Fee}$$

Termination within 3 Months	30% fee	70% refund
Termination within 6 Months	20% fee	80% refund
Termination within 9 Months	15% fee	85% refund
Termination within 12 Months	10% fee	90% refund

SAFETY FLOOR

15% LEGAL SAFETY FLOOR & MATURITY

A mandatory minimum protects principal even when daily dividend deductions would otherwise push net settlement negative.

15% **Minimum floor guarantee.** If previously processed daily-dividend deductions push net settlement into negative figures, a mandatory minimum refund of 15% of principal is guaranteed to eliminate legal risk.

12M **Upon maturity,** early-termination penalties drop to 0%. A standard 10% administration fee is deducted (returning 90%), or full principal refund executes depending on specific account settings.

06 RESERVE & SIMULATION

RESERVE ISOLATION & NETWORK SIMULATION

Circuit-breaker defence mechanisms modelled against a 130,000-user global distribution on an S-curve growth pattern.

83%

07 LEADERSHIP

EXECUTIVE BOARD & CORE LEADERSHIP

FinTech economy specialists and on-chain infrastructure builders behind the platform.

EXECUTIVE BOARD

DIRECTION & CAPITAL

GB

GIORGI BERIDZE CEO

- Oversaw the launch of **5 landmark casino infrastructure projects** across the Caucasus & Balkans.
- Bachelor of Economics, Tbilisi State University.

AS

ALEXEI SOKOLOV CSO

- Orchestrated **3 consecutive exits** in Baltic FinTech infrastructure (valuing \$45M).
- Bachelor of Statistics, Saint Petersburg State University.

PN

PETR NOVÁK CMO

- Directed capital-attraction and acquisition campaigns totalling **\$120M**.
- Master of Media Studies, Charles University, Prague.

TECHNICAL CORE TEAM

SYSTEMS & ON-CHAIN

SP

DR SERGEI PETROV CTO

- **12 years** as systems architect for HFT numerical analysis & settlement engines.
- PhD in Applied Mathematics, Lomonosov Moscow State University.

IM

IVAN MOROZOV LEAD AI

- Senior Researcher, Moscow AI Research Lab.
- National Mathematics Olympiad Winner.

AL

ANDREI LEBEDEV BLOCKCHAIN

- Computer Engineering, Tallinn University.
- Designer of secure on-chain transfer mechanisms.

Advisory Board. Giorgio Bellini — 30 years advising casino junket economies · Dr Elena Kováčsová — authority on real-world-asset on-chain tokenisation · Markus Weber — former Compliance Examiner, Liechtenstein FMA.

08 THE HORIZON

MID-TO-LONG-TERM ROADMAP & FINANCIAL PROJECTIONS

Casino-infrastructure asset diversification and growth simulation across the next three years.

- 2026

●Q1-Q4

Scaling of the live Caucasus land-based casino infrastructure integration (operational since Jan 2025); rollout of the CNYT P2P 6% leader-arbitrage dashboard.
- 2027

●Expansion

Acquisition of Philippine resort-hotel equity and official launch of a large-scale, fully-licensed online casino platform.
- 2028

●Scale

Joint-development equity in integrated eco-resorts, targeting an aggregate managed portfolio value of **\$500M**.
